PROFESSIONAL SUMMARY

B.Tech Computer Engineering student with experience in React, Flutter, Node.js, and full-stack development. Currently working as a Flutter Developer Intern and actively building web, mobile, and AI-powered applications. Passionate about creating scalable software solutions and learning modern development technologies.

EXPERIENCE

Flutter Developer Intern

Specter Technology And Games Pvt. Ltd. | Feb 2026 – Present

- Developing Flutter-based mobile application features and UI components.
- Collaborating with team members to implement and test application functionality.
- Assisting in debugging, optimization, and deployment activities.

Technologies : Flutter , Dart , C# , Django

SKILLS

TECHNICAL SKILLS

Programming languages :

- JavaScript
- Java
- Python

Databases :

- MongoDB
- PostgreSQL
- MySQL

Other Areas :

- Agentic AI
- Blockchain Fundamentals
- Embedded Systems

Frontend Development :

- React.js
- HTML5
- CSS3
- Tailwind CSS

Mobile Development :

- Flutter

Tools & Technologies :

- Git
- GitHub
- Figma
- Unity
- Arduino IDE
- Tinkercad

Backend Development :

- Node.js
- Express.js

PROJECTS

FEATURED PROJECTS

E-Commerce Website – MERN Stack

Developed a MERN-based e-commerce platform with user authentication, product catalog management, image uploads, shopping cart functionality, and responsive UI across multiple pages.

Technologies: React, Node.js, Express.js, MongoDB, Cloudinary

Github: <https://github.com/SAnto-spec/Forever-Ecommerce-Mern->

Swarm AI – multi-Agent ai platform

Developed a multi-agent AI system that continuously monitors multiple regulatory sources including RBI and SEBI, analyzes updates, and generates actionable compliance insights

Technologies: Python, APIs, Multi-Agent Systems

Github : https://github.com/armaan-syed/Swarm_AI

Student Helper AI

Developed an AI-powered student assistant integrating the Gemini API to provide real-time academic assistance, concept explanations, and study guidance through a conversational interface.

Technologies: React.js, Gemini API, JavaScript, Node.js, Tailwind CSS

Github : <https://github.com/SAnto-spec/StudyHelper.ai>

BizBoard – Admin Dashboard

Developed a responsive admin dashboard featuring analytics visualization, role-based components, interactive charts, and data management modules.

Technologies: React.js, Tailwind CSS, JavaScript, Chart.js, Node.js, Express.js

Github : <https://github.com/SAnto-spec/BizBoard>

ADDITIONAL PROJECTS

Medical Lab Management System – JAVA

Developed a JavaFX-based desktop application to manage and track laboratory equipment, improving inventory organization, asset tracking, and workflow efficiency.

Technologies: java,javafx

Github : <https://github.com/SAnto-spec/Lab-Inventory-management-2>

Cultural Regain – AR Application (Unity) for SIH 2025

Built an AR application using Unity with 3D models of heritage monuments like the Taj Mahal to support cultural preservation and tourism awareness.

Technologies: Unity, C#, AR Foundation, 3D Models

ACHIEVEMENTS

- Secured Consolation Prize at SunHacks 2026 Hackathon for building an Agentic AI solution

AREAS OF RESPONSIBILITY

Smart India Hackathon (SIH) – Technical Contributor (Primary Developer)

- Led the technical development of the AR application using Unity
- Built and integrated most of the application features and workflows
- Worked closely with the team to convert ideas into a functional prototype

Rocketry Team – Avionics & Recovery

Worked on avionics integration and recovery systems, contributing to testing, assembly, and safe deployment.

EDUCATION

EXAM	INSTITUTIONS	SCORE
BTECH COMPUTER ENGINEERING	Fr. CRCE, Mumbai University	8.86
HSC	Thomas Baptista junior college	86.87%
SSC	Holy Family Convent High School	85.80%

VOLUNTEER & OUTREACH

Volunteer for 6 and half months at Alpha seniors Old age Home, spending time with the elderly and understanding their experiences
